

# CAF Mexico

Interior and Exterior Passenger Rail Graphics / Window Film

### Project Overview:

CAF manufactured 70 passenger train cars at its plant near Mexico City. INPS contributed to this project by supplying interior and exterior decals, as well as window film for the windows and doors. All products were manufactured at INPS.

### Challenge:

1. Meeting delivery deadlines.
2. Coordinating the overall size and location of the exterior graphics, which consisted of four pieces that needed precise alignment.

### Solution:

1. INPS met the deadline challenge by closely coordinating with the installation crew.
2. INPS collaborated with an independent installation crew to ensure a smooth installation process that met the customer's expectations.

Through meticulous planning and coordination, INPS ensured the successful delivery and installation of high-quality graphics and window films for CAF's new passenger train cars, enhancing both functionality and aesthetics.

**Project Details:** Location: Mexico City, with the train cars routed to New Zealand after installation

### Scope of Project:

- Exterior Decal Kits
- Large Vinyl Logos
- Interior Wayfinding
- Transit Map Decals
- 3M™ Safety & Security Window Film Safety S40
